

VALVES SECTION

Our specialized workshop in AIC with highly skilled Technicians are able to extend our clients with all the supports required in this field as follows:

- With our consideration being as one of the best qualified workshops in this field which gained through a lot of experiments in calibration and repair of different type of control valves such as (on / off valves in different brands, reciprocating and rotary types). These services includes full valve and positioner reconditioning for different brands in case the second is beyond the calibration, we also in position of modification executive and recommendation based on customer requirements
- our certified Technicians can carry on all type of repair for different type of Pressure Safety relief valves either pilot types or conventional, they are able to trouble shoot all type of bellows PSV's either through the emergency conditions or preventive maintenance program with color coding system. Some of these types called breather safety valves which usually worked on vessels and huge tanks, with our equipments and vacuum test stand we are able to carry on the repairing and testing of these types. All the repairs above are guaranteed and certified by providing the client with repair certificate.
- Mechanical valves are the most experimental field that not only can be performed with our highly skilled Technicians , but also we are able to recommend such a solution that will extend the life of any of these valves even after considered as a scrap in regards with the types such as (Gate Globe, Butterfly ,check ,balletc)

- We do participate in different projects related to mechanical & safety relief and control valves for different companies such as Equate, KOC, PIC, KNPC and Saudi Chevron.

ON SITE TROUBLE SHOOTING

- We are pleased to assist you in any jobs related to Valves either at the site or in your maintenance workshop.
- Moreover we extend our support with all the necessary solution after the trouble shooting, we guarantee the solution by providing the third party inspection whom can assure the quality of the work and suitable procedures to rectify all the major problems.
 - We also provides consultancies for any type of valve services to solve all the technical problems which any customer might face for any type of valves.
 - Erecting , modefying or welding vessels and pipes on site and carrying out all type of x-ray & NDT inspections through our qualified QA&QC Engineers.

Some special services that we are providing:

SUPPLYING EQUIPMENTS & LIFTING EQUIPMENTS

- We are able to supply the equipments on daily or monthly basis i.e. Air Compressors, Electrical Generators, Lifting Equipments (Forklift, Cranes, Boom Truck, Man lift etc).

SELLING ALL KIND OF VALVES

- ASWAN is the main agent for BAF Valves located in Netherlands and approved in KOC, KNPC. PIC and EQUATE Petroch. Co., We are the local agent for John valves which located in Taiwan for varies type of mechanical, control, safety relief valves. According to client requirements we supply all kind of valves.

MANPOWER SUPPLY

- We are capable to supply various categories of manpower that will assist you in maintaining the high level of work and professionalism as follows:

Engineers (Electrical, Civil, Instrument, Mechanical).
Instrument Technicians.
Mechanical Technicians.
Welders (Tig, Arc & Mig).
Fabricators (Pipe & Structure).
Pipe Fitters.

Valve Technicians.
Electrical Technicians.
Store Keepers.
Helpers.
Supervisors (Pipe fitter, Welder, Fabricator, Valve technician etc.).

SOME OF OUR PRODUCTS

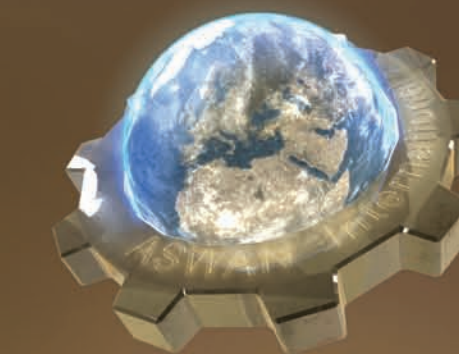

EXTRA FEATURES FOR ASWAN WORKSHOP

- Forming machine
- Computerized numerical control (CNC) Plasma cutting machines.
- Heavy duty threading machine

UNIQUE PROJECTS

- Implementation of the great idea which saved the Manhole covers from stolen in the streets which proudly done through our company.
- Implementations of the Robot guider in the streets to replace Human resources for workers own safety and to avoid the repeated accidents.

Aswan International is a General Trading & Contracting Company, established in 2000 and situated in Mina Abdulla Industrial area. The company is privately owned and professionally managed by highly skilled staff consisting of engineers, supervisors, foremen, technicians, skilled and semi skilled workers to maintain high standards. The total office and workshop area is about 2,000 Sqm, equipped with hi-tech machines and tools. For past 10 years the company successfully ventured in the different type of fields related to manufacturing, supply and process services contracts or any unique project. The company also maintains a hi-tech engineering workshop and has adequate number of vehicles for delivering the order to anywhere might client request.

AIC constructed based on different professional sections such as:

- | | |
|-------------------------------|--|
| 1- Fabrication Section | 6- Instrumentation Section |
| 2- Machine shop section | 7- Valve shop Section |
| 3- Civil construction section | 8- Paint section |
| 4- Mechanical Section | 9- Heavy equipment and logistic section (under construction) |
| 5- Electrical Section | |

FABRICATION SECTION

- This section in professionalized in all kinds of structural steel fabrication such as:
- racks, Steel ladders (Monkey or heavy ladders), Man lift basket, steel baskets, adjust fans, porta cabins, shelters ,shades, over head crane girders ,workshopsetc. with various sizes according to client requirement and specifications.
- Aswan is approved manufacturers for scaffolding steel boards and ladder clamps certified by German-Lloyd. We are able to produce these Steel Boards in various sizes, thicknesses and color; even it can be customized in accordance with the client desire.

- We execute major projects in time framed by client and guarantee the maximum quality within reasonable cost.
- We are also capable to execute on site fabrications jobs, piping racks or support with various sizes and materials.
- We are capable to fabricate, fit-up or modify all kind of pipes with difrant MOC from 1/2" up to 72" either in workshop or on site with quality and timely manner through our high technique certified x-ray welders and fabricators.

MACHINE SHOP SECTION

- Aswan is specialized in all type of machining jobs (Furmonite clamp, valves seat, clamp, milling job, rotary & valve shafts etc.) which we use to execute by our expertise work force. With the Hi-tech equipments and facilities, we apply the latest techniques professionally with maximum quality within reasonable cost.
- We are capable of machining, boring and drilling related to various types of heavy or light equipments either sensitive parts or pump, valves, generators, worn gears etc. with various sizes and heights.

- Boring & Radial Drilling jobs is one of specialized jobs in various sizes of holes and depth. We can execute the jobs with maximum quality within reasonable prices.
- With the dedicated work force available on call 24 hours a day, we have the capability to execute the most demanding jobs with speed and precision in case of emergency.

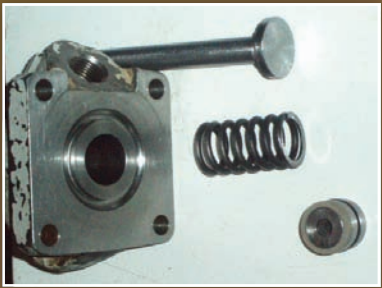

CIVIL CONSTRUCTION SECTION

- In past 10 years, we executed major civil projects with high quality performance, which are good evidence for our quality works and can assure the continuous services towards the clients.
- These accomplished projects are the proof of maintaining all civil activities including excavation, compacting, steel bend, concrete lay down, erection etc. effectively and following the civil codes. All the civil jobs has been completed within the time framed, desired by the clients.
- Our professional workers and Engineers ensure the quality with high standard civil works to be guaranteed according to the customer requirements, either the steel or the concrete works.
- We provide the various services of providing drawings, consultancy etc. for projects, conducted by our professional civil engineer.

MECHANICAL SECTION

- With our fully equipped workshop and professional Mechanical Technicians can carry out all type of troubleshooting and solving all the problems which customer may face with pumps, motors compressors, turbines and heavy equipment either diesel or petrol engines, as we did for KOC, KNPC & Equate earlier.
- We have the ability to supply any of the mentioned above equipments as new ones with best price and within the planned time frame.

ELECTRICAL SECTION

- All type of electrical wiring & connections, erecting of main power panels to the equipments or building, rewinding and repairing of various types of electrical motors of all ratings.
- Supplying various type of generators can add a big value to our reputation with our wide experience in this field.
- We are capable of on site trouble shooting for all kind of electrical works (caballing and eriction of the over head cranes sensors, generators, lifting equipments, all the building wirings , troubleshooting and reapir all type of motor operated valves.
- Calibration of different type of electrical equipments & devices, rectify different problems related to this field.
- Our electrical engineers and technicians ensure you the b est quality for any electrical projects aspects to carry on site works and solve the problems in any circumstances.

INSTRUMENTATION SECTION

- Repair & Calibrate different types of instruments such as valve positioners, Transducers, detectors, limit switches, control panels, I/P Converters, regulators, relays, air filters, control system, voltmeters, Loop calibrators, Loop indicators, loop test supply and gauges.
- All type of tubing either to valves or any other instrument works required & offered on site.
- With our die tester ensure to keep all your gages updated and reliable for all test equipments perfectly.
